

When it came to Solar, L'Aventure chose Premier Power

Background

As a responsible steward of Paso Robles wine country, L'Aventure aspires to conserve and protect the environment in all aspects of their operations.

Solar electricity provides a reliable and environmentally friendly option to alleviate peak demand power shortages and to reduce the costs associated with expensive peak-time purchases of electricity from the utility grid.

Uncork Clean Energy

With solar power, now L'Aventure can uncork clean kilowatts without compromising the future and watch their meter spin backwards as the excess power is sent back to the utility grid for credits.

“My favorite thing about the solar panels is that we are decreasing our impact on the environment, and this is a big part of sustainable agriculture,” says Dave DeBusk, vineyard manager.

The solar system will also spare the environment from harmful emissions that contribute to smog, acid rain and global warming.

Project Overview

Project location	Paso Robles, CA
System Completion	June 2006
Solar System Type.	Metal Roof Mount System
System Size35.7 kW-DC

System Configuration

PV modules used	204 GE 175W
Inverters	8 Fronius 4500
Solar System	180° South

Performance*

Estimated annual production 83,526 kWh

Environmental benefits, annually †

Greenhouse gases reduction (CO ₂)	131,035 lbs
Cars not driven	10.9 cars
Gasoline not consumed	6,746 gallons
Oil not consumed	138 barrels
Coal not burned	0.31 railcars
Offset CO ₂ emissions from electricity use from homes	7.9 homes
